STATISTICAL METHODS FOR SPEECH RECOGNITION (HARDBACK)

MIT Press Ltd, United States, 1998. Hardback. Book Condition: New. 234 x 152 mm. Language: English . Brand New Book. This book reflects decades of important research on the mathematical foundations of speech recognition. It focuses on underlying statistical techniques such as hidden Markov models, decision trees, the expectation-maximization algorithm, information theoretic goodness criteria, maximum entropy probability estimation, parameter and data clustering, and smoothing of probability distributions. The author's goal is to present these principles clearly in the simplest...

Reviews

Certainly, this is actually the greatest job by any publisher. It is really simplistic but shocks within the 50 % of the pdf. I am just happy to tell you that this is the very best ebook i have read in my own lifestyle and may be he greatest ebook for actually.

-- **Marge Jacobson MD**

It is simple in read through safer to comprehend. This is for anyone who stante that there was not a really worth reading through. It is extremely difficult to leave it before concluding, once you begin to read the book.
