Apple, the groundbreaking computer company that virtually defined home computing, reinvented itself in a big way in the late 90s, releasing a slew of blockbuster products beginning with the iMac, all the way through to the iPhone and the iPad that we know and love today. There is one product, however, that doesn't get a whole lot of press: Apple TV. A low-cost, high-powered streaming media player, the Apple TV is the culmination of a decade of planning. While every media company on the planet has, at some point, tried to take over your television set, Apple is the only company to offer a compelling product that regular people can actually afford. Whether you're a potential cable cord-cutter in the making or just looking for a new way to watch YouTube videos, this guide will teach you the ins and outs of the Apple TV world everything from setup to using iTunes for sharing your content and beyond. By the time you finish reading this guide, you'll have everything you need to know to get the most out of your new Apple TV. We'll get you going right now, saving the fluff for people with time to waste. Ready! Let's do this! This item ships from La Vergne, TN. Paperback.
